HÜPER OPTIK WINDOW FILM DRYING TIME, CARE AND MAINTENANCE

- During the window film drying process, you may notice changes in the optical clarity. A cloudy appearance may occur, if this does occur; it is normal and will go away. After the moisture dries, the hazy appearance will disappear as the film bonds to the glass. It is important to note that drying times are dramatically affected by climate.
- When cleaning, use a soft towel or cloth, or clean synthetic sponge.
- Use common cleaning solutions such as warm water and mild detergent.
- **Do NOT** use solutions that contain abrasive materials or ammonia.
- **DO NOT WASH WINDOWS UNTIL THIRTY (30) DAYS AFTER INSTALLATION OF HÜPER OPTIK WINDOW FILM.**
